Cost of Attendance/Budget Increase Request: Computer Purchase

The purpose of this form is to raise the Cost of Attendance/Budget to increase the potential amount a student can receive for financial aid from the purchasing of a computer for school purposes. **It does not in any way guarantee that a student will receive additional funding**.

This increase may only occur once during the student's academic career at Western Nevada College and may be allowed for up to $1200. The Financial Assistance office may consider a higher cost of a computer on an individual basis, which will depend on what is needed for your program requirements. If a student's loans need to be revised to accommodate this increase, please fill out the information below.

Please provide, along with this form, a copy of your receipt for your computer.
