Career Pathways

Skilled and Technical Sciences

Careers in Automated and Industrial Systems, Automotive, Construction Management, Precision Machining and Welding are for individuals who like to think outside the cubical. Students will learn skills beyond that of a laborer by experiencing a high degree of hands-on and theoretical knowledge that will enhance professional status. Students who complete a college degree and credentials are better prepared to navigate the world of work. Investigate the specific pathways that interest you and discover the career you’ve dreamed of.

Programs of Study

- Automated Systems and General Industrial
- Automotive Mechanics
- Construction Technology
- Machine Tool Technology
- Welding Technology

Funded by Carl Perkins Grant
