Course Objectives
Upon completion of this course, successful students should be able to do the following:

- Evaluate limits.
- Differentiate sums, powers, quotients, products, trigonometric and inverse trigonometric functions, logarithmic and exponential functions, explicitly and implicitly.
- Apply differentiation to curve sketching.
- Solve related rates and optimization problems.
- Use Newton's method to approximate the zeros of a function.
- Perform indefinite and definite integration of algebraic, trigonometric, exponential and logarithmic functions with the substitution method.
- Find the area under a curve.
- Solve growth and decay problems.

Course Credit: 4

Transferability Within Nevada: This course is designed to apply toward a WNC degree and/or transfer to other schools within the Nevada System of Higher Education, depending on the degree chosen and other courses completed. It may transfer to colleges and universities outside Nevada. For information about how this course can transfer and apply to your program of study, please contact a counselor.

Linkage to College Mission: Provide instruction that contributes to a student’s ability to think critically and solve problems; to reason mathematically and apply computational skills.

Option 3: Webassign with online book only ISBN: 9781285184210
**Supplies:** Text, a TI Graphing Calculator is an optional but encouraged tool (the instructor will be using a TI 89). The diagrams on the lessons are on a TI-89 calculator.

**Grading Scale:**
- **A** 90 – 100%
- **B** 80 – 89%
