WNC's Higher Education in Prison (HEP) Program provides access to higher education and workforce education for the under-served population of incarcerated men at Warm Springs and Northern Nevada Correctional Centers. The HEP program's vision follows the college's vision: To be an integral and innovative educational partner fostering equity and a life of learning in an inclusive environment for the evolving, diverse communities we serve. The program strives to always be student-centered, inquiry-driven, and data-informed and provide effective educational pathways for students. Investments in higher education in prison help reduce recidivism, increase prosocial behaviors, break the cycle of poverty, and provide hope for a second chance in life.
